

Research and Animal Services Units

ASSAY • GENOMICS •
IMMUNOLOGY • VIROLOGY •
PRECISION MEDICINE •
STEM CELL • COLONY •
BEHAVIORAL SERVICES •
PATHOLOGY • VETERINARY •
SCIENTIFIC PROTOCOL
IMPLEMENTATION • COMPLIANCE,
RECORDS, SAFETY AND TRAINING

Research highlights

- Advances in treating or preventing COVID-19, HIV, kidney disease, glaucoma and presbyopia, pregnancy disorders, polycystic ovary syndrome.
- Advances in research on Parkinson's disease, consciousness disorders, Alzheimer's disease, mental illness.
- Pluripotent stem cell discoveries leading to clinical trials for heart disease, blood cancers, blindness, improved organ transplants.
- Improvements in veterinary medicine and animal care.

Why WNPRC?

CARE FOR ANIMALS

Participate in welfare and humane treatment of engaging monkeys, ensuring that they are cared for in the best way while helping researchers succeed

INCLUSIVITY

Be part of something extraordinary, working with a diverse group of people dedicated to improving human and animal health

CONTRIBUTE TO LIFESAVING RESEARCH

Contribute to advances in stem cell, gene editing, and regenerative medicine therapies along with understanding and treating problems affecting both humans and animals including:

- infectious diseases
- brain disorders
- women's health/reproduction
- diseases of aging

Jobs at the WNPRC

ANIMAL CARE

- Animal care technician
 - Provides animal care and handling, maintenance of animal rooms, and preparation of food for animals*
- Animal care manager
- Veterinarian
- Veterinary pathologist
- Veterinary technician*

**Opportunities for advancement*

RESEARCH

- Graduate and undergraduate researchers
- Post-doctoral trainee
- Research specialist
- Scientist

BUSINESS OPERATIONS

- Facilities management and shop
- Finance, grants, human resources, procurement
- Information and data management
- Information technology systems and support
- Public outreach opportunities

Common marmosets
